# Apphatec®

## **53-003** Broad chemical protection with enhanced comfort and tectility

## Revolutionary Hybrid Technology delivering a breakthrough in chemical performance

- Extreme chemical protection: AlphaTec<sup>®</sup> 53-003, revolutionary industrial gloves that redefine chemical protection with Innovative design combining an advanced rubber polymer coating and plastic laminate technology improving chemical permeation whilst delivering comfort and tactility.
- Advanced defences: AlphaTec<sup>®</sup> 53-003 safety gloves meet the stringent requirements of EN ISO 374:2016, with 17 out of 18 candidate chemicals achieving a minimum Class 2 classification.
  16 out of 17 achieving class 6 > 480 minutes
- Specialized protection: In addition to chemical protection, they satisfy EN 407 contact heat level1, preventing workplace injuries.
- Improved durability: They also possess ENcompliant abrasion resistance.
- Elevated comfort and dexterity: unique manufacturing process allows for the glove to be form fitting.

#### Industries

- Automotive
- Chemical
- Recycling and Waste Disposal
- Utilities

### Applications

- Assembly & inspection of components
- Oil, fluids and filter change
- Painting or cleaning tools or robots
- Chemical Handling
- Transferring liquids and solids
- Chemical leaks
- Spill or leakage cleanup

## **AlphaTec**<sup>®</sup>

## 53-003 Broad chemical protection with enhanced comfort and tectility

## **Key Features**

• Performance: MICROCHEM<sup>™</sup> multi-layer barrier. Utilizing unique rubber polymer and plastic laminate technology for extreme protection against a wide range of chemical types

• Protection: contact heat approved up to 100°C/212°F, anti-static according to EN 1149-3 standards, and made without natural rubber or silicone, ensuring protection against mechanical risks and allergic reactions

• Comfort unique manufacturing process and nylon liner support to enhance comfort during use
